

Circle of concern: Amount of exported soybeans in Ghana and the unemployment rate in my community.

Circle of influence: The amount of soybeans and cashew that my community produces.

I want to start an acre of agricultural farm in my community, Bole(Northern Ghana) with the help of my primary teacher to solve the problem of over dependence on imported soybeans by at least 1% by 2030. I will be starting by the next farming season(April 2024). I am looking at how to structure the methods of using labour on my farm to ensure that it also solves part of the unemployment problem in my community.

Goal	Who leads	Problem	Objective	Deadline	Action plan	Review plan
To start an agricultural farm(cashew and soya bean)	An agric officer(teacher)	-Ghana import soybeans from other countries - High unemployment in my community	To own 1 acres of soybeans farm and cashew	2030	I will be starting this coming farming season.	How will it be of benefit to the people in my community ?
